Dear Hiring Manager,

I am writing to apply for the position of Web Application Developer at ModiFace. I believe that my previous experience in professional Web Application Development makes me an ideal candidate for this position, and I'd love the opportunity to be a part of the team at ModiFace.

Over the past summer and continuing throughout the school year I have had the opportunity to be a full stack web developer for the Ontario Ministry of Health. Over that time, I have been able to improve my skills both as a programmer and as a teammate. Working in a professional setting with a team of developers has given me great experience in effective collaboration and web development in general. Beyond work, I have continued to develop full stack web applications on my own time both for some fun, and to challenge myself to try different things. I have plenty of experience in technologies such as React, MongoDB, Node.js, typescript, and I am always eager to learn more.

Based on the job posting, the professional environment at ModiFace is the perfect place for me to develop my programming and teamwork skills further. I would love to meet with you to further discuss how my previous experience and personality make me a great fit for this position.

Sincerely,

Julien Bertazzo Lambert
