Dear Hiring Manager,

I am writing to apply for the position of Software Developer Intern at Autodesk. I have plenty of experience working as a developer within a team using version control and good collaboration practices. I am skilled in mathematics and problem solving and would love the opportunity to work on the Alias software package.

Over the past summer and continuing into the school year, I have had the pleasure of working for the Ontario Ministry of Health as a full-stack web developer. This position allowed me to improve my collaboration skills when it came to developing software within a team. I also had the chance to challenge myself by learning new technologies on the job and applying them to my work. I enjoy working on projects that are challenging but rewarding, and I hope to be able to experience this working on Alias this coming summer.

I believe that my previous experience, my passion for learning new things, and my proficiency in mathematics make me an ideal candidate for this position. I'd love the opportunity to meet with you and discuss how I might fit into the team working on Alias, and how I could make my internship at Autodesk a successful and rewarding one.

Sincerely,

Julien Bertazzo Lambert
