Dear Hiring Manager,

I am writing to apply for the position of Compiler Software Engineer at Huawei. I am currently in my 3rd year of a degree in Computer Science at the University of Toronto. I am proficient at programming in both Java and C with some exposure to C++, and I think I would make a great candidate for this job.

Over the past summer I have had the opportunity to be a full-stack developer for the Ontario Ministry of Health. Through this opportunity I improved my abilities in designing, developing, and testing software used by the Ministry. I would love to be a part of the team at Huawei with the opportunity to work on real world problems with cutting edge tools. I am looking for an internship that is challenging but rewarding and where I will be able to grow as a developer

I would love to meet with you in-person or virtually to discuss how my experience and my desire to learn would make me a great fit in your team.

Sincerely,

Julien Bertazzo Lambert
