14 December 2021

Dear Hiring Manager,

I am writing to apply for the position of PRIME Team Software Developer at AMD. I would love to be a part of the team creating state-of-the-art technologies at AMD, and I believe that my previous experience in Software Development, as well as my strong oral and written communication skills make me an ideal candidate for this position.

For over 7 months I have had the opportunity to be a full stack web developer for the Ontario Ministry of Health. While working at the Ministry gave me a great opportunity to improve both my technical skills, as well as my communication skills in a professional environment. Early on in this position I had the opportunity to lead the conversion of our entire project from Javascript to Typescript, which allowed our team to properly use object-oriented programming within our application and improved our productivity by setting the types for our data and variables. This conversion required not only technical proficiency, but also strong communication skills in meetings and in documentation within the code, in order to decide on common practices for our conversion process. By communicating successfully and working together, our team was able to complete this task in under one month. Furthermore, since September I have helped to onboard a brand-new team of interns to our project, which required carefully planned written and oral communication in order to get them comfortable with the application. Thanks to our team's efforts, the new interns were onboarded quickly and were already deploying new features within their first month of work.

I would love the opportunity to meet with you and further discuss why I might be a good fit as part of AMD's PRIME Team. I hope to be a part of the exciting and diverse environment at AMD advancing new technologies, and I believe that my technical skills and communication skills, as well as my experience using these skills in a professional environment, make me the kind of co-op student AMD is looking for.

Sincerely,

Julien Bertazzo Lambert
